

The Hampton Roads Alliance is partnering with electric commercial vehicle manufacturer, **Lion Electric**, to bring an electric vehicle
"Ride and Drive"
event to Hampton Roads.

Event cohost [Lion Electric](#) is a North American leader and innovative manufacturer of zero-emission vehicles. The company creates, designs, and manufactures all-electric Class 5 to Class 8 commercial trucks and all-electric school buses and minibuses.

This event is being organized for managers of local government and commercial fleets to learn about and test drive or ride electric school busses and trucks, but all interested in electric vehicles are welcome. Please take this opportunity to learn how your fleet may benefit from the addition of electric vehicles and help our region's transition to a clean energy future.

Wednesday February 1st 9:00am - 4:00 pm
Military Circle Mall in Norfolk, VA ([map](#))

Lion Electric will have their **LION-6 (Class 6) truck** and **LION-C school bus** at the event. Staff will be on hand to discuss charging infrastructure, maintenance, telematics, and grant funding opportunities, among other topics.

Participants can **sign up** for one hour time slots to learn about and test the vehicles at these links
